Summary

Driven Software Engineering graduate with hands-on experience developing full-stack web applications, database systems, object-oriented software, and AI solutions. Known for strong team collaboration, problem-solving, and project management skills, with a passion for delivering high-quality, user-friendly applications.

Education

Arab Academy for Science, Technology and Maritime Transport (AASTMT) Sep 2022 – Jul 2026
Bachelor of Science in Software Engineering *Cairo, Egypt*
• **Relevant Coursework:** Machine Learning, Data Structures, Algorithms, Computer Vision, Data Visualization, Model Deployment, Web Deployment

Experience & Academic Development

Freelance / Academic Developer – Multiple Projects Sep 2022 – Jul 2026
Remote / AASTMT *Cairo, Egypt*

- Collaborated with cross-functional teams to deliver 10+ projects, including AI-powered solutions, ensuring timely project delivery.
- Optimized project workflows, reducing development cycles and overall time by 20%.
- Developed a real-time Sign Language Recognition system using Python, TensorFlow, and OpenCV.
- Built a QR Cart Shopping System and a Health Center Database using R and Oracle LiveSQL.
- Created full-stack web platforms like HMK Charity Website and a Job Hiring App using PHP, MySQL, HTML, CSS, and JavaScript.
- Designed and implemented a GUI-based Classical Encryption Toolkit in Python using CustomTkinter.
- Built a Disease Surveillance and Control App using Java and OOP for healthcare data tracking and visualization.

Projects

EchoSense - Assistive AI for Independent Navigation & Well-being Sep 2025 – Jun 2026
BSc Graduation Project Team of 6 (echosense.org) *Figma, UI/UX, Data Annotation, iOS*

- Contributed to a privacy-first, fully on-device assistive AI platform for visually impaired and autistic users.
- Designed the UI/UX of the Companion iOS/Apple Watch app for autistic users and caregivers, from user research and wireframes to high-fidelity prototypes.
- Performed data annotation and preparation of training data to support the on-device ML models powering the platform.
- Co-authored the 100-page graduation thesis, assisting with technical writing, results analysis, and documentation.

API Security Testing & Vulnerability Assessment Apr 2026 – May 2026
Software Security *Postman, OWASP Juice Shop, SQL Injection*

- Executed API testing scenarios and simulated security vulnerabilities, including SQL injection and brute force attacks.
- Documented API endpoints, test cases, and vulnerability mitigations for robust software security.

QR Cart Shopping System Apr 2025 – May 2025
Retail Automation *R, Oracle LiveSQL*

- Developed a QR-based cart management system for smart retail automation.
- Integrated Oracle LiveSQL to manage transaction data, reducing manual data entry errors by 30%.

Tidy Task Management Application Feb 2026 – Apr 2026
UI/UX & Mobile Layouts *Figma, Flutter, Information Architecture*

- Led UX deliverables including problem statements, empathy maps, and information architecture.
- Developed comprehensive user flows, impact-effort matrices, and storyboard frameworks while designing Flutter interface layouts.

HomeArt Furniture App Prototype Feb 2025 – Apr 2025
UI/UX Design & Prototyping *Figma, User Research, Wireframing*

- Designed an interactive prototype for a furniture retail app, focusing on user experience and seamless navigation.
- Conducted user research to inform design decisions, creating wireframes and user flows for key features.

Website Selenium Testing Project Feb 2025 – Mar 2025
Web Automation Testing *Python, Selenium, PyTest, HTML, CSS*

- Developed and executed a test suite using Selenium and Python to automate testing of website features.
- Implemented PyTest framework to organize and run tests, generating detailed reports on test outcomes.

ICTHub Platform Landing Page Redesign Jan 2026 – Feb 2026
Web Interface Design *Figma, Visual Hierarchy*

- Explored and redesigned the landing page focusing on visual hierarchy and effective service categorization.
- Created layout sketches and organized service offerings to enhance the user journey.

Symptomly Mobile App Sep 2024 – Oct 2024
Health Tech, Mobile Development *Android (Kotlin), Flutter*

- Created an Android app that suggests home remedies based on symptom input using rule-based logic.
- Delivered clean UI/UX for users to track and manage common ailments.

InternLink Internship Website Feb 2024 – Mar 2024
Full-Stack Web Development *HTML, CSS, JavaScript, PHP, MySQL*

- Created a donation platform with live database interaction and secure CRUD operations.
- Delivered a responsive user interface and back-end logic.

Technical Skills

Programming Languages: Python, Java, C/C++, PHP, JavaScript, HTML/CSS, SQL, Kotlin, R, JSP, Servlets, JavaBeans

Machine Learning & AI: TensorFlow, Scikit-learn, OpenCV, NumPy, Pandas, Matplotlib

Design & Dev Tools: Git, GitHub, Figma, CustomTkinter, Postman

Web/Mobile: Flutter, Android

Databases: MySQL, Oracle LiveSQL

Certifications

- UI/UX Camp – ICT Hub, Egypt
- Software Development (DevOps Engineer) – Digital Egypt Pioneers Initiative (DEPI)

Languages

Arabic: Native | **English:** Fluent (Professional)
